

WEEK 3 - DAY 5

FULL BODY COMPOUNDS

Total Body Strength | Age 38 Optimized | Body Recomposition (95kg -> 80kg)

Pre-Workout: 30-40 min	Main: 60-75 min	Post-Workout: 40-50 min
------------------------	-----------------	-------------------------

PRE-WORKOUT FOUNDATION PROTOCOL (30-40 min)

SCIENCE: At age 38, extended sport-specific warm-ups are **CRITICAL**. Research shows: 1) Reduces injury risk by 50%+, 2) Improves neural drive and force production, 3) Increases joint synovial fluid for better mobility. Never skip!

Exercise	Sets x Reps	Rest	Age 38 Progression Notes
1. PUSH-UPS (Full ROM)	3 x 14 = 42	30-45s	Chest to floor, protect shoulders
2. PULL-UPS (Mixed Grip OK)	4 x 5 = 20	60-90s	Dead hang, control eccentric
3. WEIGHTED SQUATS (Goblet)	3 x 12 = 36 @ 16kg	45-60s	Below parallel, knee health

FORM CUES (AGE 38 JOINT PROTECTION):

- * Push-ups: Hands slightly wider than shoulders, elbows at 45deg (not 90deg flared)
- * Pull-ups: Full dead hang, controlled descent (3s negative), vary grip weekly
- * Squats: Sit back into hips FIRST, knees track toes, stop if knee pain

MAIN WORKOUT (60-75 min)

SCIENCE: META-ANALYSIS (PMC5684266): Medium-High Weekly Set volume (5-10+ sets/muscle) produces 15-23% greater strength gains. Tempo 2-1-2 (slower) protects joints at 38. Rest: 2-3min compounds (ATP), 60-90s isolation (metabolic stress). **BODY RECOMP:** Compound lifts preserve muscle in caloric deficit.

Exercise	Sets	Reps/Tempo	Rest	Technique Notes
Trap Bar Deadlift	4	6-8 @3-1-2	3min	Best deadlift variant for 38+ spine
Dumbbell Bench Press	3	10-12 @2-1-2	2min	Full ROM, stretch at bottom
Front Squat (Goblet OK)	3	10-12 @2-1-2	90s	Upright torso, quad focus
Seated Cable Row	3	10-12 @2-1-2	90s	Posture correction day
Standing OHP (DB)	3	10-12 @2-1-2	90s	Core engaged, no back lean
Bulgarian Split Squat	3	8 each @2-1-2	60s	Glute/quad unilateral work
Farmers Walk	3	30 sec	60s	Grip + core + metabolic boost
Plank Variations	3	45 sec	30s	Front/Side/Front rotation

POST-WORKOUT CARDIO (35-45 min)

SCIENCE: BODY RECOMPOSITION KEY: Post-workout LISS cardio maximizes fat oxidation without impairing muscle protein synthesis. At 95kg, walking burns ~85-95 kcal/km. This 3km adds ~270 kcal expenditure toward your 500-700 kcal deficit!

Activity	Distance	Target Pace	Calories Burned
1. Main Walk (Brisk)	2.0 km	11-12 min/km	~170-190 kcal
2. Recovery Walk (Easy)	1.0 km	13-14 min/km	~85-95 kcal
TOTAL	3.0 km	35-45 min	~255-285 kcal

WEEK 3 - DAY 5

FULL BODY COMPOUNDS

Total Body Strength | Age 38 Optimized | Body Recomposition (95kg -> 80kg)

BODY RECOMPOSITION WALKING TIPS (95kg -> 80kg):

- * Walking at 95kg burns 30% MORE calories than at 80kg - use this advantage!
- * Post-workout = peak fat oxidation window (glycogen depleted)
- * Add inclines or stairs when available for +50% calorie burn
- * Track steps: aim for 10,000+/day (including this walk)

COOL-DOWN STRETCHING (10-15 min)

Stretch	Duration	Done
Worlds Greatest Stretch	30 sec each side	[]
Downward Dog	45 seconds	[]
Cobra Stretch	30 seconds	[]
Supine Twist	30 sec each side	[]
Happy Baby	45 seconds	[]
Standing Forward Fold	45 seconds	[]

WEEK 3 - DAY 5

FULL BODY COMPOUNDS

Total Body Strength | Age 38 Optimized | Body Recomposition (95kg -> 80kg)

SESSION TRACKING

Date: _____

Start Time: _____

End Time: _____

Energy Level (1-10): _____

Workout Quality (1-10): _____

Sleep Last Night (hrs): _____

Pain/Discomfort (location): _____

Key Wins Today: _____
